Professional Summary

AI & Machine Learning Engineer pursuing a Bachelor of Technology in AI & ML at Srinivas University (Expected May 2027), specialising in Generative AI, NLP, RAG pipelines, and production-grade intelligent systems. Delivered measurable impact across three AICTE-recognised internships — reducing ML model error rates by 18%, deploying cloud prototypes on AWS, Azure, and IBM Cloud, and shipping AI-powered products serving 1,000+ monthly active users. Seeking an AI/ML engineering role to drive real-world impact through Python, LLMs, and scalable full-stack AI solutions.

Education

Bachelor of Technology (B.Tech) in Artificial Intelligence & Machine Learning *Aug 2023 – May 2027*
Srinivas University, Mukka, Mangalore *Expected Graduation: May 2027*

Skills

Programming	Python, Java, JavaScript, TypeScript, SQL, HTML5, CSS3
AI / ML / GenAI	Machine Learning, Deep Learning, NLP, Generative AI, RAG, Collaborative Filtering, SVD, Content-Based Filtering, IBM Watsonx.ai, Granite LLM, OpenAI API, Gemini API
Cloud & DevOps	AWS, Microsoft Azure, IBM Cloud, Firebase, Vercel, Git, GitHub
Frameworks & Tools	React, FastAPI, Node.js, Streamlit, Pandas, NumPy, Redis, PostgreSQL, JWT, Tailwind CSS, Figma, RDBMS, Advanced Java
Languages	English (Fluent), Kannada (Native), Hindi (Proficient)

Experience

AI & Machine Learning Intern *Aug 2025 – Dec 2025 · Remote, India*
Averixis Solutions | AICTE Recognised · Google Cloud Partner

- Developed and benchmarked 4+ supervised and unsupervised ML models, **reducing model error rate by 18%** through systematic hyperparameter tuning and iterative feature engineering.
- Delivered 3 end-to-end AI projects on schedule, completing 100% of AICTE programme milestones and demonstrating consistent execution under structured deadlines.
- Processed and cleaned datasets exceeding 10,000 records, building reusable data pipelines that **reduced model training time by approximately 25%** through improved data quality and faster loading.

Front-End Web Development Intern *Jun 2025 – Jul 2025 · Remote, India (6 Weeks)*
Edunet Foundation | AICTE · IBM SkillsBuild

- Engineered 3 fully responsive web applications using HTML5, CSS3, and JavaScript, achieving cross-browser compatibility across 4 platforms and full compliance with UI/UX production standards.
- Delivered all project milestones within the 6-week programme window, resulting in successful deployment to production and positive evaluation from IBM mentors.
- Applied responsive design patterns that reduced layout inconsistencies across device sizes, improving overall user experience quality.

Emerging Technologies Intern *Apr 2025 – May 2025 · Remote, India (4 Weeks)*
Edunet Foundation | AICTE · IBM

- Deployed 2 cloud-based AI prototypes on IBM Cloud infrastructure, **cutting prototype delivery time by 40%** compared to local development cycles through cloud-native tooling and automated pipelines.
- Earned AICTE-verified completion certificate by meeting all performance benchmarks within the structured 4-week IBM-backed programme.

Projects

CareerReady AI 2.0 — Career Intelligence Platform | *React · FastAPI · PostgreSQL · Redis · JWT · OpenAI · NLP · Tailwind CSS · Firebase*
<https://github.com/sudeenjain/CarrerReady>

- Engineered a full-stack career platform featuring NLP-powered ATS resume scoring (PDF/DOCX), Generative AI career prediction across the top 5 roles with probability scores, and AI mock interviews with XP gamification — **targeting 1,000+ active users at launch**.
- Built secure JWT + Redis authentication, company readiness scoring for Google, Microsoft, and Amazon, and a PWA-ready React frontend with Framer Motion animations and Recharts dashboards.

FolioAI — Generative AI Portfolio Builder | *TypeScript · EJS · Node.js · Gemini API · Generative AI · Chrome Extension · Vercel*
<https://github.com/sudeenjain/folioAI>

- Developed a full-stack Generative AI portfolio platform powered by Google Gemini, **enabling 500+ users to generate personalised developer portfolios in under 60 seconds** via a companion Chrome Extension.
- Architected a Node.js/TypeScript server with a Vite-powered frontend; deployed on Vercel with environment-based API key management and zero-downtime CI/CD.

CINEAI — AI Movie Recommendation Web App | *React · TypeScript · Node.js · TMDB API · Content-Based Filtering · NLP · Vercel*
https://github.com/sudeenjain/Movie_Recommendation

- Built an AI-powered movie recommendation web app delivering personalised suggestions through content-based filtering, NLP-driven similarity matching, and real-time TMDB API integration — deployed on Vercel.
- Implemented smart genre filtering, trending/top-rated discovery, and watchlist functionality within a modern cinematic dark-mode UI, improving content discoverability.

Book Recommender System | *Advanced Java · OOP · Data Filtering · RDBMS*
https://github.com/sudeenjain/Book_Recommender

- Delivered a Java-based recommender system actively serving **1,000+ monthly users, cutting query response time by 30%** through optimised data retrieval algorithms and strategic database indexing.

Notable Achievements

- **3 AICTE Internships Completed:** Secured and delivered three AICTE-recognised internships across AI & ML, Cloud Computing, and Web Development — all on time with verified industry certificates.
- **22 GitHub Repositories:** Maintain 22 active repositories showcasing diverse AI, ML, Generative AI, and full-stack engineering projects, reflecting consistent and public technical output.
- **6+ Credly Badges in AI/ML & Cloud:** Earned 6+ industry-recognised Credly badges specifically in AI, Machine Learning, and Cloud Computing from AWS, Microsoft, and IBM — directly aligned with target engineering roles.

Certifications

AWS Academy Cloud Foundations — Amazon Web Services, 2025
Azure Fundamentals (AZ-900) — Microsoft, 2025
Getting Started with AI — IBM, 2025
Solution Architecture — Job Simulation, Forage (IBM), 2025
IBM Machine Learning & AI — IBM SkillsBuild, 2025
